Héctor Mauricio Pineda Mora | AI Solutions Specialist | Microsoft Fabric & Power Platform Developer | Bogotá, Colombia | 3144897092 |
hmauricio.pineda@gmail.com| https://github.com/mauriciop-dev

PROFESSIONAL SUMMARY Business Administrator turned **AI Solutions Specialist** with a strong focus on **Microsoft Fabric**, **Agentic Workflows**, and **Rapid Prototyping (Vibe Coding)**. Unlike traditional developers, I combine operational strategy with technical execution to build functional AI products that solve real business problems. Expert in orchestrating multi-agent systems (AutoGen), automating enterprise workflows (n8n/Power Automate), and deploying full-stack applications.

- **Key differentiator:** Proven ability to move from "idea" to "deployed product" independently using AI-augmented development.

TECHNICAL SKILLS (The AI & Data Stack)

- **Microsoft Ecosystem: Microsoft Fabric** (Data Integration), **Power BI** (Dashboards), **Power Automate** (Workflows), **Copilot Studio**, Power Apps.
- **AI & Agents: Microsoft AutoGen** (Multi-Agent Orchestration), **n8n** (Advanced Automation), OpenAI API, LLM Integration, RAG Pipelines.
- **Vibe Coding & Dev:** React/Next.js, Supabase (Auth/Database), Vercel, Tailwind CSS, Python (Scripting & Automation), Linux Administration.
- **Operations:** Business Process Optimization, CRM Integration (HubSpot/Custom), WhatsApp API (Meta) Implementation.

FEATURED PROJECTS (Proof of Work)

1. Enterprise Agentic Automation & Microsoft Copilot *Role: AI Architect & Developer*

- Designed and deployed autonomous AI agents using **Microsoft Copilot Studio** and **AutoGen**.
- Orchestrated a "Software Development Team" simulation where multiple AI agents (PM, Dev, QA) collaborate to write and test code autonomously.
- **Technologies:** Microsoft Fabric, AutoGen Studio, Python.
- 🔗 **Demo: Multi-Agent Dev Team:** https://youtu.be/ic2rwl_3JRU
- 🔗 **Demo: Copilot Studio Implementation:** https://youtu.be/ip4daZpnsnY

2. PAIC – Intelligent Property Management SaaS *Role: Lead Developer & Product Owner*

- Built a full-stack SaaS platform for residential management from scratch using **AI-augmented coding (Vibe Coding)**.
- Integrated a Natural Language Processing (NLP) bot that allows administrators to query databases and execute commands via chat (e.g., "Register payment for Apt 305").
- **Technologies:** Next.js, Supabase (PostgreSQL), Vercel, OpenAI API.
- 🔗 **Live Platform:** https://app.paic.com.co | **Web:** https://paicai.com.co

3. Omnichannel Business Bots & Voice Automation *Role: Automation Engineer*

- Developed a complex **n8n workflow** integrating Telegram and WhatsApp (Meta API) to manage calendars and emails via voice commands.
- Deployed customer service chatbots capable of handling sales inquiries and scheduling automatically.
- **Technologies:** n8n, Webhooks, Google APIs (Calendar/Gmail), Telegram API, WhatsApp Business API.
- 🔗 **Project Link:** https://aiprodig.com/

PROFESSIONAL EXPERIENCE

AI & Digital Transformation Consultant | *Freelance / Independent 2023 – Present*

- Developing custom AI solutions for businesses, focusing on automating operational bottlenecks using **Low-Code tools** and **LLMs**.
- Implementing data visualization dashboards using **Power BI** and **Microsoft Fabric** to track KPIs.

Programa Development Officer | *USAID* | *Dic 2017 to Apr 2025*

- Led operational improvements and process optimization. I identified inefficiencies in Operaciones and implemented digital tools to reduce manual workload by 20%.

EDUCATION & CERTIFICATIONS

- **Public Administration** | ESAP
- **Master | Public Managment**
- **Creacion de agentes con copilot studio** - Platzi
- **Automatizaciones low-code con N8N** - Platzi
- **Prompt Engineering** - Platzi
- **Python** - Platzi
- *Focus:* Strategic implementation of technology in business operations.
- **Independent Coursework:** Microsoft Fabric Analytics, Building AI Agents with AutoGen, Full Stack Development with Next.js.
